

## About the Workshop

*Pediatric respiratory emergency nurse should have typical responsibilities and skills include completing assessments and on-going health evaluations, diagnosing conditions, capable of skills to meet emergencies, developing and implementing care plans, administering treatments and completing medical procedures and acquire the skill through the simulation. Simulation based hands on skill is a technique for practice and learning to replace and amplify real experiences with guided ones, often "immersive" in nature, that evoke or replicate substantial aspects of the real world in a fully interactive fashion which can be evaluated by OSCE. OSCE is a Specific foundational and functional clinical competencies, with an emphasis on skills and attitudes are tested objectively at each station and the marking schema for each station is structured.*
